Final Consolidated Invoice

SAMPLE DOCUMENT - NOT REAL PATIENT DATA

Claim Fields

- Patient Name: Ramesh Kumar Iyer
 - Invoice Number: INV-APOLLO-2026-00847
 - Total Billed Amount: INR 184500
 - ICU Charges (5 days): Qty 5 x INR 12000 = INR 60000
 - Coronary Angioplasty Procedure: Qty 1 x INR 85000 = INR 85000
 - Stent (Drug Eluting): Qty 1 x INR 28000 = INR 28000
 - Pharmacy and Consumables: Qty 1 x INR 11500 = INR 11500
-
- Synthetic supporting note 1.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
