TPA Approval Letter

SAMPLE DOCUMENT - NOT REAL PATIENT DATA

Claim Fields

- Approval Code: PA-2026-00847
 - Authorized From: 2026-05-01
 - Authorized To: 2026-05-10
 - Approved Amount: INR 1,90,000
 - TPA: Apollo Munich
 - Diagnosis: Acute myocardial infarction
-
- Synthetic supporting note 1.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.17: This sample claim document is for InsureFlow AI upload testing, OCR

- Synthetic supporting note 1.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Approval Code: PA-2026-00847
 - Authorized From: 2026-05-01
 - Authorized To: 2026-05-10
 - Approved Amount: INR 1,90,000
 - TPA: Apollo Munich
 - Diagnosis: Acute myocardial infarction
-
- Synthetic supporting note 2.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.17: This sample claim document is for InsureFlow AI upload testing, OCR

- Synthetic supporting note 2.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

Supporting Notes Page 3

- Approval Code: PA-2026-00847
 - Authorized From: 2026-05-01
 - Authorized To: 2026-05-10
 - Approved Amount: INR 1,90,000
 - TPA: Apollo Munich
 - Diagnosis: Acute myocardial infarction
-
- Synthetic supporting note 3.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.17: This sample claim document is for InsureFlow AI upload testing, OCR

- Synthetic supporting note 3.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
