

Coding Summary

ICD-10 and CPT Procedure Codes

SAMPLE DOCUMENT - NOT REAL PATIENT DATA

Claim Fields

- I21.0 - Acute transmural myocardial infarction of anterior wall
 - I25.10 - Atherosclerotic heart disease of native coronary artery
 - 92928 - Percutaneous transcatheter placement of intracoronary stent
 - 93510 - Left heart catheterization
 - Coding reviewed by: Anita Rao, Compliance Officer
-
- Synthetic supporting note 1.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 1.17: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.18: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.20: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.22: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.24: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.26: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.28: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.30: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.32: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 1.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

Validation, Extraction, Review, and Submission Screens.

- I21.0 - Acute transmural myocardial infarction of anterior wall
 - I25.10 - Atherosclerotic heart disease of native coronary artery
 - 92928 - Percutaneous transcatheter placement of intracoronary stent
 - 93510 - Left heart catheterization
 - Coding reviewed by: Anita Rao, Compliance Officer
-
- Synthetic supporting note 2.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 2.17: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake,

- Synthetic supporting note 2.18: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.20: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.22: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.24: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.26: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.28: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.30: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 2.32: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Validation supporting note 2.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

-
- Synthetic supporting note 3.1: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.2: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.3: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.4: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.5: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.6: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.7: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.8: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.9: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.10: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.11: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.12: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.13: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.14: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.15: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.16: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
 - Synthetic supporting note 3.17: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, and workflow demonstration.

- Synthetic supporting note 3.18: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.20: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.22: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.24: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.26: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.28: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.30: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.32: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.

- Synthetic supporting note 3.34: This sample claim document is for InsureFlow AI upload testing, OCR validation, and workflow demonstration. It contains no real patient information and may be used to test intake, validation, extraction, review, and submission screens.
