

Coding Summary - REVIEW NEEDED SAMPLE

ICD-10 and CPT Procedure Codes

SAMPLE DOCUMENT - NO REAL PATIENT DATA

Claim Fields

- I21.0 - Acute transmural myocardial infarction of anterior wall
- 92928 - Percutaneous transcatheter placement of intracoronary stent
- Coding reviewed by: Anita Rao, Compliance Officer

Intentional issue: Secondary diagnosis and supporting procedure detail are incomplete.

Synthetic review note 1: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 2: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 3: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 4: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 5: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 6: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 7: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 8: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 9: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 10: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 11: This sample claim document is for InsureFlow

ing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 12: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 13: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 14: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 15: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 16: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 17: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 18: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 19: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 20: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 21: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 22: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 23: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient

information.

Synthetic review note 24: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 25: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 26: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 27: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 28: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 29: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 30: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 31: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 32: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 33: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 34: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 35: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 36: This sample claim document is for InsureFlow AI negative-path test

ing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 37: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 38: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 39: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 40: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 41: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 42: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 43: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 44: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 45: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 46: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 47: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 48: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 49: This sample claim document is for InsureFlow

ing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 50: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 51: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 52: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 53: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 54: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 55: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 56: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 57: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 58: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 59: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 60: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 61: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient

information.

Synthetic review note 62: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 63: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 64: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 65: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 66: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 67: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 68: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 69: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 70: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 71: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 72: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 73: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 74: This sample claim document is for InsureFlow AI negative-path test

ing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 75: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 76: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 77: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 78: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 79: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.

Synthetic review note 80: This sample claim document is for InsureFlow AI negative-path testing, OCR validation, repair review, and workflow demonstration. It contains no real patient information.
